

## ChinaAMC (HK) Successfully Hosted the RMB Internationalization Summit 2026

【Hong Kong, 12 February 2026】

China Asset Management (Hong Kong) Limited (“ChinaAMC (HK)”) proudly hosted the RMB Internationalization Summit 2026 in Hong Kong on 11 February. The Summit attracted nearly 200 representatives from government departments, regulatory bodies, financial institutions and corporates to discuss the development of the offshore Renminbi (RMB) ecosystem and Hong Kong’s evolving role in supporting RMB internationalization.

**Mr. Paul Chan, Financial Secretary of the Government of the Hong Kong Special Administrative Region (HKSAR)**, delivered written remarks for the Summit. Several esteemed guests attended the Summit, including Mr. Xu Weigang, Director-General of the Economic Affairs Department of the Liaison Office of the Central People's Government in the Hong Kong Special Administrative Region; Mr. Joseph CHAN Ho-lim, JP, Under Secy for Financial Services & the Treasury, HKSAR; Dr Eric Yip, Executive Director of Intermediaries Division at the Securities and Futures Commission (SFC); Mr. Kenneth Hui, Executive Director (External) of the Hong Kong Monetary Authority (HKMA); Mr. Kevin Fan, Head of Fixed Income and Currencies Product Development at Hong Kong Exchanges and Clearing Limited (HKEX).

Ms Yimei Li, Vice Chairwoman and CEO of China Asset Management Co., Ltd. (“ChinaAMC”) and Mr Tian Gan, CEO of ChinaAMC (HK) delivered opening remarks for the event.

**Mr. Paul Chan Mo-po, Financial Secretary of the HKSAR**, said in his written remarks: “his year marks the beginning of the National '15th Five-Year Plan'. The plan proposes to 'promote RMB internationalization, enhance the level of capital account opening, and build an independent and controllable RMB cross-border payment system,' while also mentioning the 'steady development of digital RMB'. RMB internationalization is a crucial pillar in building a strong financial nation. Against the backdrop of the continuous opening of the national financial market, the international currency functions of the RMB are steadily strengthening. As global changes accelerate and the international monetary system moves towards a 'multi-polar' landscape, the international community holds greater expectations for the role and function of the RMB. Hong Kong is an

international financial center and the world's largest offshore RMB hub. Looking ahead, Hong Kong will more fully leverage its unique role and functions to contribute to RMB internationalization, helping to enhance the country's voice and influence in the international financial system.”

**Mr. Joseph CHAN Ho-lim, JP, Under Secy for Financial Services & the Treasury, HKSAR** said in his speech: “RMB internationalization is a vital component in building a financial powerhouse and expanding high-level opening up, and it will remain a key task during the '15th Five-Year Plan' period. As the world's largest offshore RMB hub, Hong Kong achieved significant results across various business sectors last year. Looking ahead, we will continue to fully leverage Hong Kong's unique role and functions through three key initiatives: enhancing offshore RMB liquidity, optimizing financial infrastructure, and enriching the ecosystem of RMB investment and risk management products. These efforts will contribute to the internationalization of the RMB and help elevate the country's voice and influence in the global financial system. ”

**Ms Yimei Li, Vice Chairwoman and CEO of ChinaAMC**, noted in her speech: "RMB internationalization is undergoing a structural shift from being predominantly trade settlement-driven to increasingly investment- and reserve-driven. The offshore RMB deposits have surpassed RMB 1 trillion, while the Dim Sum bond market has gained strong momentum, attracting a growing number of global issuers to Hong Kong. Against this backdrop, RMB assets are transitioning from an optional allocation to an essential allocation for global investors. ChinaAMC's strategy is to stay ahead of this structural trend by building a comprehensive pipeline of RMB-denominated investment products. Our mission is to bridge product gaps across the full spectrum of RMB-denominated equities, fixed income, and derivatives, and to leverage our active management capabilities to deliver sustainable alpha and effective RMB asset allocation solutions to global investors."

A high-level roundtable discussion followed, featuring Dr Eric Yip, Executive Director of Intermediaries Division at the SFC; Mr. Kenneth Hui, Executive Director (External) of the HKMA; Mr Kevin Fan, Managing Director, Head of Fixed Income and Currencies Product Development at HKEX; and Ms Katie He, Head of Product and Strategy at ChinaAMC (HK). The panel engaged in an in-depth exchange on the development of the offshore RMB ecosystem and explored how Hong Kong can further strengthen its role as a global “super-connector”.

**Dr Eric Yip, Executive Director of Intermediaries Division at the SFC** emphasized the importance of enhancing secondary market liquidity in Hong Kong and advancing the development of over-the-counter derivatives.

These instruments, he noted, are essential in meeting the increasingly complex and diverse needs of market participants, particularly in facilitating efficient risk transfer and liquidity management. He also highlighted the need for continued innovation, including the development of next-generation electronic trading platforms for fixed income and currency products, to provide a more diversified, efficient and secure trading and custody environment for offshore RMB assets and to attract greater international investor participation.

**Mr. Kenneth Hui, Executive Director (External) of the HKMA** underscored Hong Kong's strategic position as the world's largest and most influential offshore RMB business hub. He noted that the HKMA continues to work closely with Mainland financial regulators to further enhance various Connect Schemes and promote RMB internationalization. Current priorities include supporting real economic activities, improving market liquidity, expanding the product universe, strengthening financial infrastructure and enhancing overseas promotion, with a view to reinforcing Hong Kong's global reach in offshore RMB business and fostering a more vibrant offshore RMB ecosystem.

**Mr. Kevin Fan, Head of Fixed Income and Currencies Product Development of HKEX**, highlighted that, as global demand for interest rate, foreign exchange, and liquidity management solutions increases, HKEX is actively working to broaden its RMB-denominated products and services. HKEX is also expanding its suite of RMB derivatives, such as tools for managing interest rate and foreign exchange risks. With the People's Bank of China continuing to support offshore RMB market development, HKEX will further enhance its RMB product offerings and market infrastructure, reinforcing Hong Kong's role as a key global RMB hub.
