Quick facts

Stock code:	3145
Trading lot size:	200 Units
Manager:	China Asset Management (Hong Kong) Limited
Investment Delegate:	Mackenzie Financial Corporation – Canada (external delegation)
Trustee:	State Street Trust (HK) Limited
Registrar:	Tricor Investor Services Limited
Ongoing charges over a year:	0.45% #
Tracking difference of the last calendar year:	-0.80%##
Index:	NASDAQ Asia ex Japan Dividend Achievers™ Index
Base currency:	HKD
Trading currency:	HKD
Financial year end:	31 December
Dividend policy:	The Manager intends to distribute income to unitholders at least semi-annually (usually in March and September of each year). There is no guarantee of regular distribution payments, or the amount being distributed. Distributions may be paid out of capital or effectively out of capital as well as income at the Manager's discretion. This may result in an immediate reduction of the NAV per unit of the Sub-Fund.

The ongoing charges figure is based on expenses for the year ended 31 December 2024. This figure may vary from year to year. It represents the sum of the ongoing expenses chargeable to the Sub-Fund expressed as a percentage of the Sub-Fund's average net asset value.

This is the actual tracking difference of the calendar year ended 31 December 2024. Investors should refer to the website of the Sub-Fund for more up-to-date information on actual tracking difference.

What is this product?

ChinaAMC Asia High Dividend ETF (the “**Sub-Fund**”) is a fund constituted in the form of a unit trust established under Hong Kong law and is a sub-fund of the ChinaAMC Global ETF Series II. The Sub-Fund is a passively managed index tracking exchange traded fund falling under Chapter 8.6 of the Code on Unit Trusts and Mutual Funds issued by the SFC.

The Sub-Fund offers both listed class of Units (the “Listed Class of Units”) and unlisted classes of Units (the “Unlisted Classes of Units”). This statement contains information about the offering of the Listed Class of Units, and unless otherwise specified, references to “Units” in this statement shall refer to the “Listed Class of Units”. Investors should refer to a separate statement for the offering of the Unlisted Classes of Units.

The Listed Class of Units are listed on The Stock Exchange of Hong Kong Limited (the “**SEHK**”) and are traded on the SEHK like listed stocks.

Objective and Investment Strategy

Objective

The Sub-Fund aims to provide investment results that, before fees and expenses, closely correspond to the performance of the NASDAQ Asia ex Japan Dividend Achievers™ Index (the “**Index**”).

Strategy

The Manager intends to adopt primarily a full replication strategy to achieve the investment objective of the Sub-Fund. The Manager may however, in the appropriate circumstances, choose to use a representative sampling strategy.

When the Sub-Fund adopts the replication strategy, it will invest in substantially all the Index securities constituting the Index in substantially the same weightings (i.e. proportions) as these Index securities have in the Index.

When the Sub-Fund adopts the representative sampling strategy, it will invest, either directly or indirectly, in securities comprised in the Index, or in securities that are not included in its Index, but which the Manager believes will help the Sub-Fund achieve its investment objective.

The Sub-Fund may invest not more than 10% of its net asset value in other physical exchange traded funds (“**ETFs**”) to gain exposure to the performance of the Index.

Investors should note that the Manager may switch between the full replication and representative sampling strategies without notice to investors and in its absolute discretion.

The Sub-Fund may invest in financial derivative instruments (“**FDIs**”), including but not limited to futures and total return index swaps, for hedging or non-hedging (i.e. investment) purposes. The Sub-Fund’s holdings of FDIs for non-hedging (i.e. investment) purposes will not exceed 10% of its Net Asset Value (“**NAV**”).

This website has not been reviewed by the SFC.

The Sub-Fund currently does not intend to engage in securities lending transactions, sale and repurchase transactions or reverse repurchase transactions. Where the Sub-Fund does engage in securities financing transactions, prior approval shall be obtained from the SFC (if so required) and no less than 1 month's prior notice (or such other notice period as required by the Code) will be given to the Unitholders.

The investment strategy of the Sub-Fund is subject to the investment and borrowing restrictions set out in the Prospectus.

The Manager has appointed Mackenzie Financial Corporation as investment delegate of the Sub-Fund, whereby the Investment Delegate exercises investment discretion in respect of the investments of the Sub-Fund and is responsible for the selection and ongoing monitoring of the Sub-Fund's investments pursuant to the above investment objective and strategy, subject to the oversight of the Manager.

Index

The Index is a float adjusted modified market capitalisation weighted index comprising accepted securities with at least three consecutive years of increasing annual regular dividend payments from a universe of components that are determined to be Hong Kong, Singapore, mainland China, India, Indonesia, Korea, Malaysia, Philippines, Taiwan and Thailand.

To be eligible for inclusion in the Index, a security must meet the following additional criteria:

- (a) it must have a minimum float adjusted market capitalisation of USD200 million;
- (b) it must have a minimum three-month average daily dollar trading value of USD500,000;
- (c) it must have at least three consecutive years of increasing annual regular dividend based on ex-date;
- (d) it must have a Dividend Sustainability score greater than 80 as calculated by NASDAQ OMX Group, Inc.;
- (e) it must rank within the top 70% of components by yield of the total constituents at time of review, or within the top 80% of components by yield at time of review if they were in the Index in the prior period;
- (f) it must be included in the NASDAQ Asia Pacific Ex-Japan Index;
- (g) it must not be classified as New Zealand or Australia by NASDAQ OMX Group, Inc.;
- (h) it must not be classified as a "B" share if a security is classified as mainland China by NASDAQ OMX Group, Inc.;
- (i) it must not be classified as real estate investment trust by the Industry Classification Benchmark (ICB);
- (j) it must not have met foreign ownership restriction limitations;
- (k) if an issuer has multiple securities, the security with the highest three-month average daily dollar trading volume;
- (l) it may not have entered into a definitive agreement or other arrangement which would likely result in the security no longer being Index eligible; and
- (m) it may not be issued by an issuer currently in bankruptcy proceeding.

The Index was launched on 13 January 2014 and had a base level of 1,000.

The Index is a total return net index. A total return net index calculates the performance of the index constituents on the basis that any dividends or distributions are reinvested after the deduction of any taxes that may apply.

As at 28 March 2025, the Index had a total market capitalisation of HKD 9.00 trillion and 151 constituents out of the eligible Asian markets defined by the Index.

The Index is denominated in HKD.

The Manager (and each of its Connected Persons) is independent of The NASDAQ OMX Group, Inc., the Index Provider.

You can obtain the most updated list of the constituents of the Index together with their respective weightings and additional information of the Index including the index methodology and the closing level of the Index from the website of The NASDAQ OMX Group, Inc. at <https://www.nasdaq.com/solutions/nasdaq-global-index-policies>. This website has not been reviewed by the SFC. Please refer to the Manager's website for the latest hyperlink for the Index.

Use of derivatives / investment in derivatives

The Sub-Fund's net derivative exposure may be up to 50% of its Net Asset Value.

What are the key risks?

Investment involves risks. Please refer to the Prospectus for details including the risk factors.

High Dividend Yield Securities Risk

- The Sub-Fund invests in high dividend yield securities which may offer a higher rate of dividend yield. However, high dividend yield securities are subject to risks that the dividend could be reduced or abolished, or the risks that the value of the securities could decline or have lower-than average potential for price appreciation.

Emerging Market Risk

- The Sub-Fund invests in a number of Asian emerging markets. Investing in emerging markets involves a greater risk of loss than investing in more developed markets due to, among other factors, greater political, tax, economic, foreign exchange, liquidity and regulatory risks.

Risk Relating to Investment in Other ETFs

- The Sub-Fund may be subject to a higher tracking error than other funds which do not invest in collective investment scheme due to its strategy of investing in the other ETFs as a result of, amongst other things, the tracking error of the other ETFs.
- The Sub-Fund may be adversely affected by any trading suspension of the other ETFs.

Management Risk

- Because there can be no guarantee that the Sub-Fund's performance is identical to that of the Index, it is subject to management risk. This is the risk that the Manager's and

the Investment Delegate's strategy, the implementation of which is subject to a number of constraints, may not produce the intended results. In addition, the Manager and the Investment Delegate (as a delegate of the Manager) have absolute discretion to exercise Unitholders' rights with respect to securities comprising the Sub-Fund. There can be no guarantee that the exercise of such discretion will result in the investment objective of the Sub-Fund being achieved.

Reliance on the Investment Delegate Risk

- The Manager has delegated the exercise of investment discretion for the Sub-Fund to the Investment Delegate. Unitholders must rely on the Investment Delegate in implementing the investment strategies and the performance of the Sub-Fund is largely dependent on the services and skills of its officers and employees. In the case of loss of service of the Investment Delegate or any of its key personnel, as well as any significant interruption of the Investment Delegate's business operations or in the extreme case of the insolvency of the Investment Delegate, the trustee may not find successor managers/investment delegates with the requisite skills, qualifications and the new appointment may not be on equivalent terms or of similar quality. The occurrence of any of these events may have an adverse impact on the Sub-Fund's performance and thus the value of your investment.

Tracking Error Risk

- The Sub-Fund may use representative sampling strategy. It is therefore possible that the Sub-Fund may be subject to a greater risk of tracking error, which is the risk that its performance may not track that of the Index accurately. Other factors such as fees and expenses, and inability to rebalance the Sub-Fund's holdings in response to changes to the Index may also cause tracking error. There can be no assurance of exact or identical replication at any time of the performance of the Index.

Investment Risk

- The Sub-Fund is an investment fund. There is no guarantee of the repayment of principal. Therefore your investment in the Sub-Fund may suffer losses.

Foreign Exchange Risk

- An investment in the Sub-Fund may directly or indirectly involve exchange rate risk. The constituent securities of the Index may be denominated in currencies other than the base currency of the Sub-Fund (which is the HKD). Fluctuations in the exchange rates between such currency and the base currency may have an adverse impact on the performance of the Sub-Fund.

Passive Investment Risk

- The Sub-Fund is not actively managed and will not adopt any temporary defensive position against any market downturn. Therefore when there is a decline in the Index, the Sub-Fund will also decrease in value. Investors may suffer significant losses accordingly.

Risks associated with investment in FDIs

- Risks associated with FDIs include counterparty/credit risk, liquidity risk, valuation risk, volatility risk and over-the-counter transaction risk. The leverage element/component of an FDI can result in a loss significantly greater than the amount invested in the FDIs

by the Sub-Fund. Exposure to FDIs may lead to a high risk of significant loss by the Sub-Fund.

Differences in dealing arrangements between Listed and Unlisted Classes of Units

- Investors of Listed and Unlisted Classes of Units are subject to different pricing and dealing arrangements. The NAV per Unit of each of the Listed and Unlisted Classes of Units may be different due to different fees and cost applicable to each class. The trading hours of The Stock Exchange of Hong Kong Limited applicable to the Listed Class of Units in the secondary market and the dealing deadlines in respect of the Listed Class of Units (on the primary market) or Unlisted Classes of Units are also different.
- Units of the Listed Class of Units are traded on the stock exchange in the secondary market on an intraday basis at the prevailing market price (which may diverge from the corresponding NAV), while Units of the Unlisted Classes of Units are sold through intermediaries based on the dealing day-end NAV and are dealt at a single valuation point with no access to intraday liquidity in an open market. Depending on market conditions, investors of the Unlisted Classes of Units may be at an advantage or disadvantage compared to investors of the Listed Class of Units.
- In a stressed market scenario, investors of the Unlisted Classes of Units could redeem their Units at NAV while investors of the Listed Class of Units in the secondary market could only redeem at the prevailing market price (which may diverge from the corresponding NAV) and may have to exit the Sub-Fund at a significant discount. On the other hand, investors of the Listed Class of Units could sell their Units on the secondary market during the day thereby crystallising their positions while investors of the Unlisted Classes of Units could not do so in a timely manner until the end of the day.

Trading Risk

- Generally, retail investors can only buy or sell Units on the SEHK. The trading price of the Units on the SEHK is subject to market forces and may trade at a substantial premium or discount to the net asset value per Unit.
- As investors will pay certain charges (e.g. trading fees and brokerage fees) to buy or sell Units on the SEHK, investors may pay more than the net asset value per Unit when buying Units on the SEHK, and may receive less than the net asset value per Unit when selling Units on the SEHK.

Reliance on Market Makers Risk

- Although the Manager ensures that at least one market maker will maintain a market for the Units of the Sub-Fund, it should be noted that liquidity in the market for the Units may be adversely affected if there is no market maker for the Units of the Sub-Fund. The Manager will seek to mitigate this risk by ensuring at least one market maker for the Units of the Sub-Fund gives not less than 3 months' notice prior to terminating market making. It is possible that there is only one SEHK market maker to the Sub-Fund, or the Manager may not be able to engage a substitute market maker within the termination notice period of a market maker, and there is also no guarantee that any market making activity will be effective.

Distributions out of or effectively out of capital risks

- Payment of dividends out of capital or effectively out of capital amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment. Any such distributions may result in an immediate reduction

in the NAV per Unit of the Sub-Fund. This may also reduce the capital that the Sub-Fund has available for investment in future and may constrain capital growth.

Early Termination Risk

- The Sub-Fund may be terminated early under certain circumstances, for example, where the Index is no longer available for benchmarking or if the aggregate net asset value of all the Units (including Unlisted Class(es) of Units) of the Sub-Fund is less than HKD100 million. Investors should refer to “Termination” in the Prospectus for further details. Investors may suffer a loss when the Sub-Fund is terminated.

How has the fund performed?

Note: With effect from 23 December 2024, the investment strategy of the Sub-Fund was changed to allow investment in FDIs for hedging or non-hedging purposes and the holdings of FDIs for non-hedging purposes will not exceed 10% of the Sub-Fund's NAV. The performance of the Sub-Fund since then has factored in the above change. Since 28 May 2021, the Manager of the Sub-Fund changed from BMO Global Asset Management (Asia) Limited to China Asset Management (Hong Kong) Limited and the investment management function of the Sub-Fund has been delegated to Mackenzie Financial Corporation. The performance of the Sub-Fund prior to 2021 was achieved under circumstances that no longer apply.

- Past performance information is not indicative of future performance. Investors may not get back the full amount invested.
- The computation basis of the performance is based on the calendar year end, NAV-to-NAV, with dividends reinvested.
- These figures show by how much the Sub-Fund increased or decreased in value during the calendar year shown. Performance data is calculated in HKD including ongoing charges and excluding expenses payable by investors on the SEHK.
- Where no past performance is shown there was insufficient data available in that year to provide performance.
- Underlying Index: NASDAQ Asia ex Japan Dividend Achievers™ Index
- Sub-Fund launch date: 13 November 2014

Is there any guarantee?

The Sub-Fund does not have any guarantees. You may not get back the amount of money you invest.

What are the fees and charges?

Charges incurred when trading the fund on the SEHK

<u>Fee</u>	<u>What you pay</u>
Brokerage fee	Market rates
Transaction levy	0.0027% ¹
Accounting and Financial Reporting Council (“AFRC”) transaction levy	0.00015% ²
Trading fee	0.00565% ³
Stamp duty	Nil

Ongoing fees payable by the Sub-Fund

The following expenses will be paid out of the Sub-Fund. They affect you because they reduce the net asset value of the Sub-Fund which may affect the trading price.

	<u>Annual rate (as a % of net asset value)</u>
Management Fee**	0.45% per annum
Trustee Fee	Included in the management fee
Registrar Fee	Included in the management fee
Performance Fee	Nil
Administration Fee	Included in the management fee
Other Ongoing Costs	Please refer to the Prospectus for details of ongoing costs payable by the Sub-Fund

* The current fees in respect of the Sub-Fund payable to the Manager as described above may be increased on notice to Unitholders, subject to the permitted maximum rates. Please refer to the section headed “Fees and Expenses” in the Prospectus for further details of the fees and charges payable and the permitted maximum rates of such fee allowed as well as other ongoing expenses that may be borne by the Sub-Fund.

Where the Sub-Fund invests in funds which are managed by the Manager or its connected persons (the “underlying funds”), the Manager will procure that the underlying fund(s) will not charge any management fee in order to ensure no double-charging of management fees.

Other fees

You may have to pay other fees when dealing in the Units of the Sub-Fund. Please refer to the Prospectus for details of other fees and expenses applicable to the creation or redemption, or dealing in Units. You should also check with your intermediaries on the payment process including the currency that you should use for settling such fees and how they set the exchange

¹ Transaction levy of 0.0027% of the trading price of the Units, payable by each of the buyer and the seller.

² AFRC transaction levy of 0.00015% of the trading price of the Units, payable by each of the buyer and the seller.

³ Trading fee of 0.00565% of the trading price of the Units, payable by each of the buyer and the seller.

rate to be used if any currency conversion is required in the transaction.
