Quick facts

Manager:	China Asset Management (Hong Kong) Limited
Investment Delegate:	Mackenzie Financial Corporation – Canada (external delegation)
Trustee:	State Street Trust (HK) Limited
Transfer Agent:	State Street Bank and Trust Company
Ongoing charges over a year[#]:	Class A Units: Estimated to be 0.85% Class B Units: Estimated to be 1.24%
Estimated annual tracking difference^{##}:	Class A Units: Estimated to be -0.85% Class B Units: Estimated to be -1.24%
Index:	Bloomberg APAC High Dividend 40 Net Return Index HKD
Dealing Frequency:	Daily on each business day
Base currency:	HKD
Financial year end:	31 December
Distribution policy:	<i>Accumulation Unlisted Classes of Units:</i> There will be no dividend distributions. All interest and other income earned on investments will be accumulated and re-invested into the Sub-Fund on behalf of the Unitholders of the relevant accumulation Classes. <i>Distribution Unlisted Classes of Units:</i> The Manager intends to distribute income to unitholders at least monthly. Distributions may be paid out of capital or effectively out of capital as well as income at the Manager's discretion. This may result in an immediate reduction of the NAV per unit of the Sub-Fund.

[#] As the Unlisted Class of Units of the Sub-Fund is newly set up, this figure is a best estimate only and represents the sum of the estimated ongoing charges over a 12-month period of an Unlisted Class, expressed as a percentage of the estimated average net asset value for the same period for the relevant Class. It may be different upon actual operation of the Unlisted Class of Units and may vary from year to year. The estimated ongoing charges do not represent the estimated tracking error.

^{##} This is an estimated annual tracking difference. Investors should refer to the website of the Sub-Fund for more up-to-date information on actual tracking difference.

Minimum Initial Investment and Minimum Holding:

Class A HKD (ACC):	HKD 1,000
Class A HKD (DIST):	HKD 1,000

What is this product?

ChinaAMC Asia High Dividend ETF (the “**Sub-Fund**”) is a fund constituted in the form of a unit trust established under Hong Kong law and is a sub-fund of the ChinaAMC Global ETF Series II. The Sub-Fund is a passively managed index tracking exchange traded fund falling under Chapter 8.6 of the Code on Unit Trusts and Mutual Funds issued by the SFC.

The Sub-Fund offers both listed class of Units (the “Listed Class of Units”) and unlisted classes of Units (the “Unlisted Classes of Units”). This statement contains information about the offering of the Unlisted Class of Units, and unless otherwise specified, references to “Units” in this statement shall refer to the “Unlisted Class of Units”. Investors should refer to a separate statement for the offering of the Listed Classes of Units.

Objective and Investment Strategy

Objective

The Sub-Fund aims to provide investment results that, before fees and expenses, closely correspond to the performance of the Bloomberg APAC High Dividend 40 Net Return Index HKD (the “**Index**”).

Strategy

The Manager intends to adopt primarily a full replication strategy to achieve the investment objective of the Sub-Fund. The Manager may however, in the appropriate circumstances, choose to use a representative sampling strategy.

When the Sub-Fund adopts the replication strategy, it will invest in substantially all the Index securities constituting the Index in substantially the same weightings (i.e. proportions) as these Index securities have in the Index.

When the Sub-Fund adopts the representative sampling strategy, it will invest, either directly or indirectly, in securities comprised in the Index, or in securities that are not included in its Index, but which the Manager believes will help the Sub-Fund achieve its investment objective. In pursuing a representative sampling strategy, the Manager may cause the Sub-Fund to deviate from the Index weighting on the condition that the maximum deviation from the Index weighting of any constituent will not exceed 3% or such other percentage as determined by the Manager after consultation with the SFC.

The Sub-Fund may invest not more than 10% of its Net Asset Value ("**NAV**") in other physical exchange traded funds ("**ETFs**") to gain exposure to the performance of the Index.

Investors should note that the Manager may switch between the full replication and representative sampling strategies without notice to investors and in its absolute discretion.

The Sub-Fund may invest in financial derivative instruments ("**FDIs**"), including but not limited to futures and total return index swaps, for hedging or non-hedging (i.e. investment) purposes. The Sub-Fund's holdings of FDIs for non-hedging (i.e. investment) purposes will not exceed 10% of its NAV.

The Sub-Fund currently does not intend to engage in securities lending transactions, sale and repurchase transactions or reverse repurchase transactions. Where the Sub-Fund does engage in securities financing transactions, prior approval shall be obtained from the SFC (if so required) and no less than 1 month's prior notice (or such other notice period as required by the Code) will be given to the Unitholders.

The investment strategy of the Sub-Fund is subject to the investment and borrowing restrictions set out in the Prospectus.

The Manager has appointed Mackenzie Financial Corporation as investment delegate of the Sub-Fund, whereby the Investment Delegate exercises investment discretion in respect of the investments of the Sub-Fund and is responsible for the selection and ongoing monitoring of the Sub-Fund's investments pursuant to the above investment objective and strategy, subject to the oversight of the Manager.

Index

The Index seeks to track the 40 companies with the highest estimated dividend yield from the Bloomberg APAC Large, Mid & Small Cap Index (the "**Parent Index**"), subject to currency, market and sector diversification. The Parent Index is a float market capitalization weighted equity benchmark that covers 99% of the market capitalisation in the Asia-Pacific (APAC) markets. For the purposes of the Parent Index, the APAC markets include Australia, Hong Kong, Japan, New Zealand, Singapore, China, India, Indonesia, Korea, Malaysia, the Philippines, Taiwan and Thailand.

The companies in the Index are weighted in proportion to their Bloomberg Estimates Dividend Yield¹. Specifically, the weight of a constituent is calculated by dividing its Bloomberg Estimates

¹ Bloomberg Estimates Dividend Yield is a ratio calculated by dividing the Bloomberg Estimates Dividend Per Share (BEst DPS) by the latest close price of the security. BEst DPS is calculated using a period-bound

Dividend Yield by the sum of the Bloomberg Estimates Dividend Yields of all constituents in the Index.

To be eligible for inclusion in the Index, a company must be a constituent of the Parent Index, subject to further eligibility requirements specific to the Index in terms of stock exchange, security type and classes of securities. Companies will then be subject to a 4-step selection process, which includes (1) market data screening (which requires a company to have a minimum free float market capitalisation of USD750 million, a minimum 90-day average value traded at USD10 million and a Bloomberg Estimates Dividend Yield smaller than or equal to 20%), (2) quality screening (which requires a company to be within the top 90th percentile based on a composite quality rank derived from the leverage and return on equity ratios of the company), (3) diversification screening (which requires a company to rank within 15th by Bloomberg Estimates Dividend Yield rank within the companies with same currency, market and sectors) and (4) final selection based on Bloomberg Estimates Dividend Yield.

The Index was launched on 23 July 2025 and had a base level of 1,000 on 30 March 2015.

The Index is a net total return index. A net total return index calculates the performance of the index constituents on the basis that any dividends or distributions are reinvested after the deduction of any taxes that may apply.

As of 16 October 2025, the Index had a market capitalisation of USD568 billion and 40 constituents.

The Index is denominated in HKD.

The Index is compiled and published by Bloomberg Index Services Limited (the “Index Provider”). The Manager (and each of its Connected Persons) is independent of the Index Provider.

You can obtain the most updated list of the constituents of the Index together with their respective weightings and additional information of the Index, including the index methodology, the closing level and other important news of the Index, from the website of the Index Provider at <https://www.bloomberg.com/quote/BAHD40H:IND> and <https://www.bloomberg.com/professional/products/indices/documentation/>. Please refer to the Manager’s website for the latest hyperlinks for the Index (these websites have not been reviewed by the SFC).

Index Code

Bloomberg Code: BAHD40NH

Use of derivatives / investment in derivatives

The Sub-Fund’s net derivative exposure may be up to 50% of its Net Asset Value.

What are the key risks?

weighted average (Blended Forward) methodology and reflects the consensus estimate, which is the mean of at least three sell-side analyst estimates for Dividends Per Share. The period-bound weighted average (Blended Forward) methodology combines dividend estimates for the current fiscal year (Year 1) and the next fiscal year (Year 2) to calculate a blended forward-looking estimate over a 12-month forward period. The Year 1 estimate is weighted based on the proportion of the 12-month forward period that falls within the current fiscal year, while the Year 2 estimate is weighted by the remaining proportion of the 12-month forward period that falls within the next fiscal year.

Investment involves risks. Please refer to the Prospectus for details including the risk factors.

High Dividend Yield Securities Risk

- The Sub-Fund invests in high dividend yield securities which may offer a higher rate of dividend yield. However, high dividend yield securities are subject to risks that the dividend could be reduced or abolished, or the risks that the value of the securities could decline or have lower-than average potential for price appreciation.

Concentration in Asian Markets Risk / Emerging Market Risk

- The Sub-Fund's investments are concentrated in Asian markets. The value of the Sub-Fund may be more susceptible to adverse economic, political, policy, foreign exchange, liquidity, tax, legal or regulatory event affecting Asian markets.
- Certain Asian markets in which the Sub-Fund invests may be emerging markets. Investing in emerging markets involves a greater risk of loss than investing in more developed markets due to, among other factors, greater political, tax, economic, foreign exchange, liquidity and regulatory risks.

Sector Concentration Risk

- The Sub-Fund's investments may from time to time be concentrated in one or more sectors. The value of the Sub-Fund may be more volatile than that of a fund having a more diverse portfolio of investments. The value of the Sub-Fund may be more susceptible to adverse economic, political, policy, foreign exchange, liquidity, tax, legal or regulatory event affecting the relevant sector.

Risk Associated with Small-Capitalisation / Mid-Capitalisation Companies

- The stocks of small-capitalisation/ mid-capitalisation companies may have lower liquidity and their prices are more volatile and susceptible to adverse economic developments than those of larger capitalisation companies in general.

Management Risk

- Because there can be no guarantee that the Sub-Fund's performance is identical to that of the Index, it is subject to management risk. This is the risk that the Manager's and the Investment Delegate's strategy, the implementation of which is subject to a number of constraints, may not produce the intended results. In addition, the Manager and the Investment Delegate (as a delegate of the Manager) have absolute discretion to exercise Unitholders' rights with respect to securities comprising the Sub-Fund. There can be no guarantee that the exercise of such discretion will result in the investment objective of the Sub-Fund being achieved.

Reliance on the Investment Delegate Risk

- The Manager has delegated the exercise of investment discretion for the Sub-Fund to the Investment Delegate. Unitholders must rely on the Investment Delegate in implementing the investment strategies and the performance of the Sub-Fund is largely dependent on the services and skills of its officers and employees. In the case of loss of service of the Investment Delegate or any of its key personnel, as well as any significant interruption of the Investment Delegate's business operations or in the extreme case of the insolvency of the Investment Delegate, the trustee may not find successor managers/investment delegates with the requisite skills, qualifications and the new appointment may not be on equivalent terms or of similar quality. The occurrence of any of these events may have an adverse impact on the Sub-Fund's performance and thus the value of your investment.

Differences in dealing arrangements between Listed and Unlisted Classes of Units

- Investors of Listed and Unlisted Classes of Units are subject to different pricing and dealing arrangements. The NAV per Unit of each of the Listed and Unlisted Classes of Units may be different due to different fees and cost applicable to each class. The trading hours of The Stock Exchange of Hong Kong Limited applicable to the Listed Class of Units in the secondary market and the dealing deadlines in respect of the Listed Class of Units (on the primary market) or Unlisted Classes of Units are also different.
- Units of the Listed Class of Units are traded on the stock exchange in the secondary market on an intraday basis at the prevailing market price (which may diverge from the corresponding NAV), while Units of the Unlisted Classes of Units are sold through intermediaries based on the dealing day-end NAV and are dealt at a single valuation point with no access to intraday liquidity in an open market. Depending on market conditions, investors of the Unlisted Classes of Units may be at an advantage or disadvantage compared to investors of the Listed Class of Units.
- In a stressed market scenario, investors of the Unlisted Classes of Units could redeem their Units at NAV while investors of the Listed Class of Units in the secondary market could only redeem at the prevailing market price (which may diverge from the corresponding NAV) and may have to exit the Sub-Fund at a significant discount. On the other hand, investors of the Listed Class of Units could sell their Units on the secondary market during the day thereby crystallising their positions while investors of the Unlisted Classes of Units could not do so in a timely manner until the end of the day.

New Index Risk

- The Index is new and has minimal operating history by which investors can evaluate its previous performance. The Sub-Fund may be riskier than other exchange traded funds tracking more established indices with longer operating history.

Tracking Error Risk

- The Sub-Fund may use representative sampling strategy. It is therefore possible that the Sub-Fund may be subject to a greater risk of tracking error, which is the risk that its performance may not track that of the Index accurately. Other factors such as fees and expenses, and inability to rebalance the Sub-Fund's holdings in response to changes to the Index may also cause tracking error. There can be no assurance of exact or identical replication at any time of the performance of the Index.

Investment Risk

- The Sub-Fund is an investment fund. There is no guarantee of the repayment of principal. Therefore your investment in the Sub-Fund may suffer losses.

Foreign Exchange Risk

- An investment in the Sub-Fund may directly or indirectly involve exchange rate risk. The constituent securities of the Index may be denominated in currencies other than the base currency of the Sub-Fund (which is the HKD). A class of Units may be designated in a currency other than the base currency of the Sub-Fund. Fluctuations in the exchange rates between such currency and the base currency may have an adverse impact on the performance of the Sub-Fund.

Passive Investment Risk

- The Sub-Fund is not actively managed and will not adopt any temporary defensive position against any market downturn. Therefore when there is a decline in the Index, the Sub-Fund will also decrease in value. Investors may suffer significant losses accordingly.

Risks associated with investment in FDIs

- Risks associated with FDIs include counterparty/credit risk, liquidity risk, valuation risk, volatility risk and over-the-counter transaction risk. The leverage element/component of an FDI can result in a loss significantly greater than the amount invested in the FDIs by the Sub-Fund. Exposure to FDIs may lead to a high risk of significant loss by the Sub-Fund.

RMB currency risk and RMB denominated classes risk

- RMB is currently not freely convertible and is subject to exchange controls and restrictions which, under exceptional circumstances, may cause a delay in payment of redemptions and/or dividend payments in RMB. Although offshore RMB (CNH) and onshore RMB (CNY) are the same currency, they trade at different rates. Any divergence between CNH and CNY may adversely impact investors.
- Non-RMB based investors who invest in RMB denominated classes are exposed to foreign exchange risk and there is no guarantee that the value of RMB against the investors' base currency will not depreciate. Any depreciation of RMB could adversely affect the value of investors' investment in the RMB denominated classes of Units.

Distributions out of or effectively out of capital risks

- Payment of dividends out of capital or effectively out of capital amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment. Any such distributions may result in an immediate reduction in the NAV per Unit of the Sub-Fund. This may also reduce the capital that the Sub-Fund has available for investment in future and may constrain capital growth.

Early Termination Risk

- The Sub-Fund may be terminated early under certain circumstances, for example, where the Index is no longer available for benchmarking or if the aggregate NAV of all the Units (including Listed Class of Units) of the Sub-Fund is less than HKD100 million. Investors should refer to "Termination" in the Prospectus for further details. Investors may suffer a loss when the Sub-Fund is terminated.

Rebalancing Period Risk

- The Index of the Sub-Fund was changed from the NASDAQ Asia ex Japan Dividend Achievers™ Index (the "Previous Index") to the Bloomberg APAC High Dividend 40 Net Return Index HKD effective from 31 October 2025. The rebalancing of assets held by the Sub-Fund as a result of the change in the Index is anticipated to take place over a period of up to 3 trading days (the "Rebalancing Period"). During the Rebalancing Period, the holdings of the Sub-Fund will be rebalanced from the constituents of the Previous Index to the constituents of the Index. During the Rebalancing Period, the tracking error and tracking difference of the Sub-Fund may increase due to the rebalancing activities. Investors who deal with Units of the Sub-Fund during the Rebalancing Period should exercise caution.

How has the fund performed?

Since the Unlisted Class of Units of the Sub-Fund is newly set up, there is insufficient data to provide a useful indication of past performance to investors.

Is there any guarantee?

The Sub-Fund does not have any guarantees. You may not get back the amount of money you invest.

What are the fees and charges?

Charges which may be payable by you

<u>Fee[^]</u>	<u>What you pay</u>
Subscription fee	Up to 3% of the subscription amount
Switching fee	Up to 1%
Redemption fee	NA

[^] Investors may be subject to swing pricing adjustments when they subscribe for, redeem, or switch Unlisted Classes of Units for an amount normally not exceeding 1% of the relevant NAV per Unit. For details, please refer to section "Anti-Dilution Pricing Adjustment" in Schedule 3 to Part 1 of the Prospectus.

Ongoing fees payable by the Sub-Fund

The following expenses will be paid out of the Sub-Fund. They affect you because they reduce the return you get on your investments.

	<u>Annual rate (as a % of NAV)</u>
Management Fee^{**}	Class A Units: 0.60% per annum Class B Units: 0.99% per annum
Trustee Fee[*]	0.07%, subject to a minimum fee of USD7,000 per month
Administration Fee	Included in the Trustee Fee
Performance Fee	Nil
Other Ongoing Costs	Please refer to the Prospectus for details of ongoing costs payable by the Sub-Fund

* The current fees in respect of the Sub-Fund as described above may be increased on notice to Unitholders, subject to the permitted maximum rates. Please refer to the section headed "Fees and Expenses" in the Prospectus for further details of the fees and charges payable and the permitted maximum rates of such fees allowed as well as other on-going expenses that may be borne by the Sub-Fund.

Where the Sub-Fund invests in funds which are managed by the Manager or its connected persons (the "underlying funds"), the Manager will procure that the underlying fund(s) will not charge any management fee in order to ensure no double-charging of management fees.

Other fees

You may have to pay other fees when dealing in the Units of the Sub-Fund. Please refer to the Prospectus for details of other fees and expenses applicable to the subscription or redemption, or dealing in Units. You should also check with your intermediaries on the payment process

including the currency that you should use for settling such fees and how they set the exchange rate to be used if any currency conversion is required in the transaction.

Additional Information

You generally buy and redeem Units at the Sub-Fund's next-determined NAV after the Trustee receives your request in good order on or before 11:00 a.m. (Hong Kong time) being the dealing cut-off time for Unlisted Classes of Units. Different distributors may impose different dealing deadlines for receiving requests from investors. The valuation point is at approximately 6:00 p.m. (Hong Kong time) on the applicable valuation day (which coincides with each dealing day).

You can find the following information in respect of the Sub-Fund at the following website at www.chinaamc.com.hk (this website has not been reviewed by the SFC).

- (a) the Prospectus and this product key facts statement in respect of the Sub-Fund (as revised from time to time);
- (b) the latest annual audited accounts and interim half yearly unaudited report (in English only);
- (c) any notices for material alterations or additions to the Prospectus or the Sub-Fund's constitutive documents;
- (d) any public announcements made by the Sub-Fund, including information with regard to the Sub-Fund and Index, notices of the suspension of the calculation of the NAV, changes in fees and the suspension and resumption of the subscription and redemption of Unlisted Class of Units;
- (e) the last NAV per Unit of each Unlisted Class of Units in issue;
- (f) the full holdings of the Sub-Fund (updated on a daily basis);
- (g) the tracking difference and tracking error of the Sub-Fund;
- (h) the composition of distributions (i.e. the relative amounts of distributions paid and the percentages of dividends out of (i) net distributable income and (ii) capital) for a rolling 12-month period.

Real-time updates about the Index can be obtained through other financial data vendors. Additional and the latest updated information about the Index (including without limitation, a description of the way in which the Index is calculated, any change in the composition of the Index, any change in the method for compiling and calculating the Index) can be obtained via the Manager's website and the Index Provider's website (neither of which, nor any other website referred to in this statement or the Prospectus, has been reviewed by the SFC). Please refer to the section on "Website Information" for the warning and the disclaimer regarding information contained in such website.

The NAV of the Sub-Fund is calculated and the price of Unlisted Classes of Units published on each business day on the website <https://www.chinaamc.com.hk> (this website has not been reviewed by the SFC).

Please refer to the Prospectus for details.
