Fund Factsheet

As of 31 May 2023

37/F, Bank of China Tower, 1 Garden Road, Hong Kong

Investment involves risks, including the loss of principle. Past performance is not indicative of future results. Before investing in the ChinaAMC Bloomberg China Treasury + Policy Bank Bond Index ETF (the "Fund"), investors should refer to the Fund's prospectus for details, including the risk factors. You should not make investment decision based on the information on this material alone. Please note:

- The Fund aims to provide investment result that, before fees and expenses, closely corresponds to the performance of the Bloomberg China Treasury + Policy Bank Index (the "Index").
- The Fund is subject to concentration risk as a result of tracking the performance of a single geographical region (the PRC) and investing in bonds of a few issuers. The NAV of the Fund is likely to be more volatile than a broad-based fund.
- Investments in the PRC may involve increased risks compared to more developed markets, such as liquidity risks, currency risks/control, political and economic uncertainties, legal and taxation risks, settlement risks and custody risk.
- The Fund is subject to risks associated with Bond Connect and Foreign Access Regime, such as change of relevant rules and regulations, regulatory risks, volatility risk, liquidity risk, settlement and counterparty risk. The trading on the PRC interbank bond market or trading through Bond Connect may be suspended.
- The Fund is subject to risk associated with debt securities, such as credit / counterparty risk, interest rate risk, volatility and liquidity risk, downgrade risk, sovereign debt risk, valuation risk, credit rating risk and credit agency risk.
- The Fund is subject to risks relating to settlement procedures and default of counterparties on the PRC inter-bank bond market.
- The Fund is denominated in RMB. RMB is currently not freely convertible and is subject to exchange controls and restrictions. The Fund has units traded in HKD and USD. Investors may be subject to additional costs or losses associated with foreign currency fluctuations.
- The Fund may be subject to tracking error risk.
- If any suspension of the inter-counter transfer of units between the counters and/or any limitation on the level of services by brokers and CCASS participants occurs, unitholders will only be able to trade their units in one counter only. The market price of units traded in each counter may deviate significantly.
- The Fund is passively managed and the Manager will not have the discretion to adapt to market changes. Falls in the Index are expected to result in corresponding falls in the value of the Fund.
- Generally, retail investors can only buy or sell units of the Fund on the SEHK. The trading price of the units on the SEHK is driven by market factors such as the demand and supply of the units. Therefore, the units may trade at a substantial premium or discount to the Fund's NAV.

¹ Past performance information is not indicative of future performance. Investors may not get back the full amount invested. The computation basis of the performance is calculated on NAV-to-NAV, with dividend reinvested.

Performance analysis here refer to RMB counter units. US/HK dollar-based investors are therefore exposed to fluctuations in the USD/HKD/RMB exchange rate. Performance analytics here refer to RMB counter unit.

² Please refer to the Fund's prospectus for further details (including fees).

³ Calculated since June 6, 2018, the first official NAV date of the fund.

⁴ Subject to the Manager's discretion. The Manager intends to distribute income in January, April, July and October of each year to Unitholders having regard to the Fund's net income after fees and costs. Distributions will only be paid from net income after deduction of all fees and costs and no distributions will be paid out of or effectively out of the capital of the Fund. All Units (whether RMB or HKD or USD traded Units) will receive distributions in RMB only.
