

ChinaAMC MSCI China A 50 Connect ETF

(Stock Code: 2839 HK / 82839 HK / 9839 HK)

Fund Factsheet

As of 30 Jun 2023

37/F, Bank of China Tower, 1 Garden Road, Hong Kong

Investment involves risks, including the loss of principle. Past performance is not indicative of future results. Before investing in the ChinaAMC MSCI China A 50 Connect ETF (the "Fund"), investor should refer to the Fund's prospectus for details, including the risk factors. You should not make investment decision based on the information on this material alone. Please note:

- The Fund aims to provide investment result that, before fees and expenses, closely corresponds to the performance of the MSCI China A 50 Connect Index (the "Index").
- The Fund is passively managed. Falls in the Index are expected to result in corresponding falls in the value of the Fund.
- The Fund's investment in equity securities is subject to general market risks, whose value may fluctuate due to various factors.
- The Index is a new index. The Fund may be riskier than those tracking more established indices with longer operating history.
- The Fund is subject to concentration risks in a single geographical region (Mainland China). The Fund may be more volatile than a broadly-based fund.
- The Fund is subject to risks associated with the Stock Connect, such as change of relevant rules and regulations, quota limitations, suspension of the Stock Connect programme.
- The Fund is subject to securities lending transactions risks, including the risk that the borrower may fail to return the securities in a timely manner.
- The Fund is denominated in RMB. RMB is currently not freely convertible and is subject to exchange controls and restrictions. Non-RMB based investors in units are exposed to foreign exchange risk.
- As the SSE and the SZSE may be open when units in the Fund are not priced, the value of the securities in Fund's portfolio may change on days when investors will not be able to purchase or sell the Fund's units. Differences in trading hours between the SSE, the SZSE and the SEHK, and A-Shares' trading bands may increase the level of premium/discount of the unit price to its NAV.
- Generally, retail investors can only buy or sell units of the Fund on the SEHK, of which the trading price is driven by market factors such as the demand and supply of the units. Therefore, the units may trade at a substantial premium or discount to the Fund's NAV.
- The Fund is subject to tracking error risk.
- If any suspension of the inter-counter transfer of units and/or any limitation on the level of services by brokers and CCASS participants occurs, unitholders will only be able to trade their units in one counter. The market price of units traded in each counter may deviate significantly.
- Unitholders will receive distributions in the RMB only. Unitholder without RMB account may have to bear the fees and charges associated with currency conversion.
- The Fund may at its discretion pay distribution out of capital or effectively out of capital. Payment of dividends out of capital or effectively out of capital amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment. Any distributions may result in an immediate reduction in the NAV per Unit of the Fund.

▲ Investment Objective

The investment objective is to provide investment results that, before fees and expenses, closely correspond to the performance of the MSCI China A 50 Connect Index.

¹ Past performance information is not indicative of future performance. Investors may not get back the full amount invested. The computation basis of the performance is calculated on NAV-to-NAV, with dividend reinvested.

Performance analysis here refer to RMB counter units. US/HK dollar-based investors are therefore exposed to fluctuations in the USD/HKD/RMB exchange rate. With effect from 1 November 2022, the investment strategy of the Sub-Fund was changed. The performance of the Sub-Fund prior to 1 November 2022 was achieved under circumstances that no longer apply.

² Please refer to the Fund's prospectus for further details (including fees).

³ Calculated since 10 December 2021, the first official NAV date of the fund.

⁴ Total expense ratio is based on expenses for the year ended 30 December 2022, which include management fee, trust fee, etc. It does not represent tracking error. The ongoing charges figure is based on expenses for the year ended 30 December 2022. This figure may vary from year to year. It represents the sum of the ongoing expenses chargeable to the Sub-Fund expressed as a percentage of the average Net Asset Value.

⁵ The Manager intends to distribute income to Unitholders at least annually (usually in July), having regard to the Fund's net income after fees and costs. All Units (whether RMB, HKD or USD traded Units) will receive distributions in RMB only. Distributions may be paid out of capital or effectively out of capital as well as income at the Manager's discretion.
