Investment involves risks, including the loss of principal. Past performance is not indicative of future results. Before investing in the ChinaAMC Asia USD Investment Grade Bond ETF (the "Fund"), investor should refer to the Fund's prospectus for details, including the risk factors. You should not make investment decision based on the information on this material alone. Please note:

- The fund aims to provide investment results that, before fees and expenses, closely correspond to the performance of the Bloomberg Asia USD Investment Grade Bond Index. The Fund primarily invests in fixed rate USD-denominated government-related and corporate investment grade bonds of the Asia ex-Japan region. Such investments involve special risks including interest rate risk, over-the-counter market risk, issuer risk, sovereign debt risk and illiquidity of bonds close to maturity risk.
- Investing in emerging markets involves a greater risk of loss than investing in more developed markets due to, among other factors, greater political, tax, economic, foreign exchange, liquidity and regulatory risks.
- The units of the Fund may trade at a substantial premium or discount to their NAV.
- The Fund is subject to tracking error risks due to factors such as fees and expenses, the representative sampling strategy adopted by the Manager and the liquidity of the underlying bonds.
- The Fund's Base Currency is in HKD but has units traded in USD (in addition to HKD). Investors may be subject to additional costs or losses associated with foreign currency fluctuations between the Base Currency and the USD trading currency when trading units in the secondary market.
- If there is a suspension of the inter-counter transfer of units between the counters and/or any limitation on the level of services provided by brokers and CCASS participants, unitholders will only be able to trade their units in one counter, which may inhibit or delay an investor dealing.
- The market price of units traded in each counter may deviate significantly due to different factors such as market liquidity, market supply and demand in each counter and the exchange rate fluctuations between HKD and USD.
