Investment involves risks, including the loss of principle. Past performance is not indicative of future results. Before investing in the ChinaAMC MSCI Japan Hedged to USD ETF (the "Fund"), investor should refer to the Fund's prospectus for details, including the risk factors. You should not make investment decision based on the information on this material alone. Please note:

- The Fund aims to provide investment results that, before fees and expenses, closely correspond to the performance of the MSCI Japan 100% Hedged to USD Index.
- The Fund concentrates its investment in Japanese securities and is subject to concentration risk as a result of tracking the performance of a single country (Japan). It is likely to be more volatile than a broad-based fund as it is more susceptible to fluctuations in value resulting from adverse conditions in Japan.
- The Fund invests in currency forward contracts for hedging purposes. While this approach is designed to minimise the impact of currency fluctuations on the Fund's returns, there are associated risks involved including costs of hedging, derivative and OTC transactions risks.
- The units of the Fund may trade at a substantial premium or discount to their NAV.
- The Fund is subject to tracking error risks due to factors such as fees and expenses, cost of hedging and the representative sampling strategy that may be adopted by the Manager.

Investment Objective
