- The Fund aims to provide investment results that, before fees and expenses, closely correspond to the performance of the MSCI Japan 100% Hedged to USD Index.
- The Fund concentrates its investment in Japanese securities and is subject to concentration risk as a result of tracking the performance of a single country (Japan). It is likely to be more volatile than a broad-based fund as it is more susceptible to fluctuations in value resulting from adverse conditions in Japan.
- The Fund invests in currency forward contracts for hedging purposes. While this approach is designed to minimise the impact of currency fluctuations on the Fund's returns, there are associated risks involved including costs of hedging, derivative and OTC transactions risks.
- The units of the Fund may trade at a substantial premium or discount to their NAV.
- The Fund is subject to tracking error risks due to factors such as fees and expenses, cost of hedging and the representative sampling strategy that may be adopted by the Manager.

With effect from 23 December 2024, the investment strategy of the Fund was changed to allow investment in FDIs for hedging or non-hedging purposes and the holdings of FDIs for non-hedging purposes will not exceed 10% of the Fund's NAV. The performance of the Fund since then has factored in the above change. Since 28 May 2021, the Manager of the Fund changed from BMO Global Asset Management (Asia) Limited to China Asset Management (Hong Kong) Limited and the investment management function of the Fund has been delegated to Mackenzie Financial Corporation. The performance of the Fund prior to 2021 was achieved under circumstances that no longer apply.

There is no guarantee of regular distribution payments, or the amount being distributed. There is no current intention to make distribution out of capital or effectively out of capital.
