

ChinaAMC Select Fixed Income Allocation Fund

Fund Factsheet

As of 30 Jun 2023

37/F, Bank of China Tower, 1 Garden Road, Hong Kong

Investment involves risks, including the loss of principal. The price of units or shares of the Funds may go up as well as down. Past performance is not indicative of future results. The value of the Funds can be extremely volatile and could go down substantially within a short period of time. You should read the Fund's Placing Memorandum or Explanatory Memorandum and Product Key Facts Statement for details, including risk factors. Investors should not base investment decisions on this marketing material alone. Please note:

- ChinaAMC Select Fixed Income Allocation Fund (the "Fund") seeks to achieve capital appreciation by investing not less than 70% of the NAV in fixed income and debt instruments in markets worldwide.
- Investment in debt instruments involves volatility and liquidity risk, credit risk, interest rate risk, credit rating risk, valuation risk, downgrade risk and sovereign debt risk. Fixed income and debt instruments which are below investment grade or unrated are subject to lower liquidity, higher volatility, higher credit risk and greater risk of loss.
- Investment in short-term debt instruments are not risk-free. The turnover rates of the Fund's investments may be relatively high, as such the transaction costs incurred by the Fund will increase.
- RMB is not freely convertible and is subject to exchange controls and restrictions. There is no guarantee that the value of RMB against the investor's base currencies will not depreciate. Any depreciation of RMB could adversely affect the value of investors' investments in the Fund. Payment of redemptions and/or dividend in RMB may be delayed due to exchange controls and restrictions.
- Certain investments acquired by the Fund are denominated in currencies different from the Base Currency. The NAV of the Fund may be affected by exchange rates and by changes in exchange rate control.
- The Fund may acquire FDIs and may invest in structured notes for hedging purpose. The price of a derivative instrument can be very volatile and involves counterparty risk. Structured notes are complex, illiquid and there are risks of mispricing or improper valuation. They may not always perfectly track the value of the securities, rates or indices they are designed to track. Besides, structured notes are subject to insolvency or default risk of the issuers and usually involve an embedded leverage, so a relatively small adverse market movement could expose the Fund to an exceeded loss. In adverse situations, such hedging may become ineffective.
- The Fund may invest in other funds and additional fees may involve. There can be no assurance that 1) the liquidity of the underlying funds will always be sufficient to meet redemption requests; and 2) investment objective and strategy of the underlying funds will be successfully achieved.

▲ Investment Objective

The Fund seeks to achieve capital appreciation by directly or indirectly investing not less than 70% of the Net Asset Value of the Fund in fixed income and debt instruments in markets worldwide.

▲ Manager's Comment

In June, accompanied by better-than-expected US economic data and hawkish decisions or statements from major central banks, US bond yields rose, and the extent of the inverted yield curve deepened. The sentiment was relatively bullish, and after pausing its rate hikes, the Federal Reserve hinted at the possibility of two more rate hikes, delaying market expectations for the starting point of rate cuts. There are further signs of weakness in the Chinese economy, and the market is waiting for policy stimulus. Credit spreads further compressed and approached the low point of the year, while Chinese investment-grade bonds continued to match their peers, and high-yield real estate bonds first rose and then fell. The portfolio reduced its holding ratio of long-dated bonds and hedged relatively high proportions against interest rates, actively capturing investment opportunities in newly-issued bonds worldwide.
