

ChinaAMC Select Flexible Cycle Income Fund

Fund Factsheet | As of 27 Feb 2026

New Capital Investment Entrant Scheme (New CIES) Eligible fund

Investment involves risks, including the loss of principal. The price of units or shares of the Funds may go up as well as down. Past performance is not indicative of future results. The value of the Funds can be extremely volatile and could go down substantially within a short period of time. You should read the Fund's Placing Memorandum or Explanatory Memorandum and Product Key Facts Statement for details, including risk factors. Investors should not base investment decisions on this marketing material alone. Please note:

- ChinaAMC Select Flexible Cycle Income Fund (the "Fund") seeks to achieve income and capital appreciation by primarily investing not less than 70% of the Net Asset Value of the Sub-Fund in fixed income instruments worldwide.
- The Fund is subject to risk associated with monthly dealing frequency. Investors can only subscribe to or redeem from the Fund on a monthly basis. Compared to funds with higher dealing frequencies, investors of the Fund are subject to lower liquidity, higher likelihood of triggering redemption restrictions, and may not be able to exercise their judgment to deal during market volatility or extreme market circumstances not occurring on a Dealing Day.
- The Fund is subject to general fixed income instruments risk, volatility and liquidity risk, credit risk, interest rate risk, credit rating risk, valuation risk, downgrade risk, sovereign debt risk and risks associated with "Dim Sum" bonds.
- RMB is not freely convertible and is subject to exchange controls and restrictions. Any depreciation of RMB could adversely affect the value of the Fund. Payment of redemptions and/or dividend in RMB may be delayed due to exchange controls and restrictions.
- The Fund's investments exposure may concentrate in Greater China markets (including Mainland China markets), which involves concentration risk, risks associated with emerging market, greater political, tax, economic, foreign exchange, liquidity, legal and regulatory risks.
- The Fund may invest in fixed income instruments with loss-absorption features. Investments in such instruments are subject to higher liquidity, valuation and sector concentration risk.
- The Fund may acquire derivative for hedging purpose. The price of a derivative can be very volatile which may result in losses in excess of the amount invested in the derivative.
- The Fund may at its discretion pay distribution out of capital or effectively out of capital. Payment of distributions out of capital or effectively out of capital amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment. Any such distributions may result in an immediate reduction in the NAV per Unit of the Fund.

▲ Investment Objective

The Fund seeks to achieve income and capital appreciation by primarily investing not less than 70% of the Net Asset Value of the Fund in fixed income instruments worldwide.

1 Please refer to the Fund's prospectus for further details (including fees).

2 Past performance information is not indicative of future performance. Investors may not get back the full amount invested. The computation basis of the performance is calculated on a daily NAV-to-NAV basis, with dividend reinvested (in case of distributing/distribution unit/share class, without dividend reinvested), daily NAV is zero if units or shares of a fund, sub-fund or share class are fully redeemed. Where no past performance is shown, meaning there was insufficient data available in that period to calculate and provide fair performance.

3 Calculated since the inception date of each respective share class.

4 Credit rating is calculated using the Best Rating Approach, by referencing to the credit ratings of three credit rating agencies: Moody's, Fitch and S&P and using the highest rating among the three ratings.

5 Calculated with the weighted average of median yield to worst of each holding. Yield to Worst is the lowest potential yield on a bond assuming no default by the issuer. It is calculated by evaluating the least favourable outcome for each bond issue. It is not indicative of the fund's actual performance, or the interest investors may ultimately receive.
