

ChinaAMC Select RMB Bond Fund

Fund Factsheet

As of 31 Oct 2023

37/F, Bank of China Tower, 1 Garden Road, Hong Kong

Investment involves risks, including the loss of principal. The price of units or shares of the Funds may go up as well as down. Past performance is not indicative of future results. The value of the Funds can be extremely volatile and could go down substantially within a short period of time. You should read the Fund's Placing Memorandum or Explanatory Memorandum and Product Key Facts Statement for details, including risk factors. Investors should not base investment decisions on this marketing material alone. Please note:

- ChinaAMC Select RMB Bond Fund (the "Fund"), through the RQFII quota obtained by the Manager, invests primarily in RMB denominated fixed income securities issued or distributed in the PRC and may invest a small portion of its assets in PRC A-Shares.
- The Fund is subject to regulations which regulate investments by RQFIIs in the PRC which have just been announced and novel in nature. Any uncertainty and change to the relevant laws and regulations (such as PRC tax laws and repatriation policy) in the PRC may adversely impact the Fund.
- Investment in single country (the PRC) markets involves concentration and other risks not typically associated with investment in more developed economies or markets.
- Investment in RMB debt instruments in the PRC involves liquidity risk, credit risk, credit rating risk and downgrade risk. There may not be a liquid or active market for such RMB debt instruments; the Fund may also be exposed to credit/insolvency risk of issuers of the debt securities. As the credit ratings of the debt instruments of the Fund are largely assigned by the credit agencies in the PRC, the methodologies adopted by such local rating agencies may not be consistent with the international rating agencies. In the event of downgrading in the credit ratings of a debt instrument or its issuer, the Fund's investment value in such security may be adversely affected.
- Investment in the Fund is subject to interest rate risk. Change of macro-economic policies in the PRC such as monetary and fiscal policy may cause changes to market interest rates, affecting the pricing of bonds and thus the return of the Fund.
- The Fund is denominated and settled in RMB; subscription and redemption must be made in RMB. RMB is not freely convertible and is subject to exchange controls and restrictions. There is no guarantee that RMB will not depreciate. HKD Investors may suffer a loss if RMB depreciates against HKD or such other currencies.

▲ Investment Objective

The Fund seeks to achieve capital appreciation and income generation by principally (i.e. up to 100% of its net assets) investing in (i) RMB denominated fixed income instruments, including bonds, issued or distributed within the PRC which (a) are denominated and settled in RMB and (b) are traded on the interbank bond market or are traded or transferred on the exchange market in the PRC, and (ii) fixed income funds (including money market funds) approved by the China Securities Regulatory Commission ("CSRC") and offered to the public in the PRC*.

* Investment in fixed income funds approved by the CSRC which are offered to the public in the PRC will not exceed 10% of the net asset value of the Fund.

ChinaAMC Select RMB Bond Fund

Fund Factsheet

▲ Manager's Comment

October continues to see lackluster economic data in China. Whether it be CPI/PPI, manufacturing PMI, exports/imports, or aggregate social finance, the markets can't find strong signals of improvement. In the meantime, the private sector is in a de-leverage mode, leading to a slow contraction of aggregate demand. To be fair, the Chinese government is taking the route of fiscal expansion, as many economists have advised. New additions to annual government debt issuance have been quickly implemented in Oct to alleviate local governments' fiscal burden and support new infrastructure expenses. Nevertheless, it will take a while for the effect to be felt. The Chinese leadership appears willing to let the economy cruise through the bottoming process while healing the setbacks in the property sector.

Onshore bond yields rise to Oct highs as the liquidity crunch becomes acute towards month-end. However, yields start to come back down in Nov. It's advisable to stay sidelined in Q4 because market anticipation for the economy in the coming year tends to be negative for bonds. It may be more so this year in that the Chinese government has probably only started to employ fiscal policy more than before to support economic growth. The PBoC will be comfortable taking a back seat, which means less monetary easing. However, the wild card is on the other side of the Pacific. If the Fed in the U.S. confirms its policy pivot in 2024, there will be a knock-on effect on Chinese monetary policy. In that scenario, the PBoC will find additional policy space to maneuver, to the advantage of bond investors. In the aftermath of APEC where leaders of China and America meet to reduce bilateral acrimony, Chinese equities have a chance to rebound. Nevertheless, unfavorable environment persists in general. Besides the drag of property sectors, the bright part of the economy, namely EVs, the photovoltaic industry, etc., will meet more challenges as competition becomes fierce and overseas protectionism may rise. The overall geopolitical atmosphere may turn more toxic in 2024 too, when multiple elections are slated to take place around the globe. Equities will likely price in these expectation beforehand and may overdone in the pricing.

▲ Portfolio Allocation

Sector Exposure (%)

Weighted Avg Duration	1.87 Years
Weighted Avg Credit Ratings	AA+
Weighted Avg Yield to Maturity ¹	2.20%

Credit Products include Medium Term Notes, Convertible Bonds, Corporate Bonds, Enterprise Bonds.

Data Source: Wind. Rating agencies include Dagong, China Lianhe, Pengyuan, CCXI, CCXR, Shanghai Brilliance, China LianHe. Data As of 31 Oct 2023

▲ Latest Fund Distribution

Class	Ex-dividend Date	Distribution	Annualized Dividend Yield
Class A-DIST-RMB	30/10/2023	RMB 0.03	4.33%
Class A-DIST-USD	30/10/2023	USD 0.03	5.43%

Dividend is not guaranteed and may be paid out of capital or effectively paid out of capital.

Annualized Dividend Yield = $[(1 + \text{distribution per unit} / \text{ex-dividend NAV})^{12}] - 1$. The annualized dividend yield is calculated based on the latest dividend distribution with dividend reinvested, and may be higher or lower than the actual annual dividend yield. Positive distribution yield does not imply positive return.
