

ChinaAMC Select RMB Bond Fund

Fund Factsheet

华夏基金(香港)有限公司
CHINA ASSET MANAGEMENT (HONG KONG) LIMITED

As of 30 Nov 2023

37/F, Bank of China Tower, 1 Garden Road, Hong Kong

Investment involves risks, including the loss of principal. The price of units or shares of the Funds may go up as well as down. Past performance is not indicative of future results. The value of the Funds can be extremely volatile and could go down substantially within a short period of time. You should read the Fund's Placing Memorandum or Explanatory Memorandum and Product Key Facts Statement for details, including risk factors. Investors should not base investment decisions on this marketing material alone. Please note:

- ChinaAMC Select RMB Bond Fund (the "Fund"), through the RQFII quota obtained by the Manager, invests primarily in RMB denominated fixed income securities issued or distributed in the PRC and may invest a small portion of its assets in PRC A-Shares.
- The Fund is subject to regulations which regulate investments by RQFIIs in the PRC which have just been announced and novel in nature. Any uncertainty and change to the relevant laws and regulations (such as PRC tax laws and repatriation policy) in the PRC may adversely impact the Fund.
- Investment in single country (the PRC) markets involves concentration and other risks not typically associated with investment in more developed economies or markets.
- Investment in RMB debt instruments in the PRC involves liquidity risk, credit risk, credit rating risk and downgrade risk. There may not be a liquid or active market for such RMB debt instruments; the Fund may also be exposed to credit/insolvency risk of issuers of the debt securities. As the credit ratings of the debt instruments of the Fund are largely assigned by the credit agencies in the PRC, the methodologies adopted by such local rating agencies may not be consistent with the international rating agencies. In the event of downgrading in the credit ratings of a debt instrument or its issuer, the Fund's investment value in such security may be adversely affected.
- Investment in the Fund is subject to interest rate risk. Change of macro-economic policies in the PRC such as monetary and fiscal policy may cause changes to market interest rates, affecting the pricing of bonds and thus the return of the Fund.
- The Fund is denominated and settled in RMB; subscription and redemption must be made in RMB. RMB is not freely convertible and is subject to exchange controls and restrictions. There is no guarantee that RMB will not depreciate. HKD Investors may suffer a loss if RMB depreciates against HKD or such other currencies.

▲ Investment Objective

The Fund seeks to achieve capital appreciation and income generation by principally (i.e. up to 100% of its net assets) investing in (i) RMB denominated fixed income instruments, including bonds, issued or distributed within the PRC which (a) are denominated and settled in RMB and (b) are traded on the interbank bond market or are traded or transferred on the exchange market in the PRC, and (ii) fixed income funds (including money market funds) approved by the China Securities Regulatory Commission ("CSRC") and offered to the public in the PRC*.

* Investment in fixed income funds approved by the CSRC which are offered to the public in the PRC will not exceed 10% of the net asset value of the Fund.

¹Past performance information is not indicative of future performance. Investors may not get back the full amount invested. The computation basis of the performance is calculated on NAV-to-NAV, with dividend reinvested. The investment returns are denominated in RMB. US/HK dollar-based investors are therefore exposed to fluctuations in the US/HK dollar/RMB exchange rate. With effect from 9 February 2018, the investment strategy of the Fund was changed. Performance information prior to 9 February 2018 was achieved under circumstances that no longer apply. The investment objective of the Fund has also been changed on 11 April 2014.

²Please refer to the Fund's Explanatory Memorandum for further details (including fees).

³Calculated since the relevant inception date of the respective share class.

ChinaAMC Select RMB Bond Fund

Fund Factsheet

▲ Manager's Comment

Lingering deflation risk resurfaces in Nov when the CPI slides into negative territory again after sitting at near-zero levels for two consecutive months. The contraction of private sector demand appears persistent. To avoid a spiraling downward trend, fiscal policy needs to pick up the slack. Although the Chinese government has rolled out an incremental debt plan in Q4 to boost government expenditures, the magnitude seems insufficient. The government's desire for a new economic growth formula, i.e., growth driven by hi-tech manufacturing sectors, is manifest. However, time is of essence. The old growth engine, namely property and related industries, accounts for nearly a quarter of total Chinese GDP and is not easily replaceable. Turning off the broken old engine has taken a heavy toll on the Chinese economy. A correction is now needed. The key message from the recent Politburo meeting is that growth has become the top priority for policymakers. Going forward, the government demands establishing the new before abolishing the old and urges pursuing stability through growth. In light of the message, the fiscal deficit and economic growth rate targets for the next year are likely to be on the high side.

Bond yields have stayed in range since early Q4 as bond investors trade more on PBoC's Open Market Operations than on economic prospects because the former, through daily funding costs, affects their portfolios more than the latter. Investors will be looking out for new guidance from various government announcements, which tend to come forth when the year turns. The typical market movements in 2023 following major policy announcements pan out in three phases: bond yields overshoot when the news comes out; then they come off when policy effects prove under expectation; and then the government comes up with a new package of policies. If the pattern is still valid in 2024, bond investors will likely find buy opportunities in the first half of 2024.

▲ Portfolio Allocation

Sector Exposure (%)

Weighted Avg Duration	1.87 Years
Weighted Avg Credit Ratings	AA+
Weighted Avg Yield to Maturity ¹	2.39%

Credit Products include Medium Term Notes, Convertible Bonds, Corporate Bonds, Enterprise Bonds.

Data Source: Wind. Rating agencies include Dagong, China Lianhe, Pengyuan, CCXI, CCXR, Shanghai Brilliance, China LianHe. Data As of 30 Nov 2023

▲ Latest Fund Distribution

Class	Ex-dividend Date	Distribution	Annualized Dividend Yield
Class A-DIST-RMB	29/11/2023	RMB 0.03	4.36%
Class A-DIST-USD	29/11/2023	USD 0.03	5.34%

Dividend is not guaranteed and may be paid out of capital or effectively paid out of capital.

Annualized Dividend Yield = $[(1 + \text{distribution per unit} / \text{ex-dividend NAV})^{12}] - 1$. The annualized dividend yield is calculated based on the latest dividend distribution with dividend reinvested, and may be higher or lower than the actual annual dividend yield. Positive distribution yield does not imply positive return.

Data source: Bloomberg. As of 30 Nov 2023.

¹ Calculated with the weighted average of median yield to maturity of each holding.
