

ChinaAMC Select China Leap Equity Fund

Fund Factsheet

As of 31 Aug 2022

37/F, Bank of China Tower, 1 Garden Road, Hong Kong

Investment involves risks, including the loss of principal. The price of units or shares of the Funds may go up as well as down. Past performance is not indicative of future results. The value of the Funds can be extremely volatile and could go down substantially within a short period of time. You should read the Fund's Placing Memorandum or Explanatory Memorandum and Product Key Facts Statement for details, including risk factors. Investors should not base investment decisions on this marketing material alone. Please note:

- ChinaAMC Select China Leap Equity Fund (the "Fund") invests primarily in equity securities of China-related companies with registered offices located in the People's Republic of China ("PRC") and/or Hong Kong, and/or China-related companies that do not have their registered offices in the PRC or Hong Kong which in the opinion of the Manager, have strong prospects for leap growth or will benefit from leap growth of China, by accessing whether the company's business revenue is driven by Chinese consumption increase, technology progress or demographic trend, or whether the company is covered by the development plans of the Chinese government, including but not limited to the "14th Five-Year Plan of China", the "Made in China 2025 Plan", the "Carbon Neutrality Strategy of China".
- The Fund may invest in fixed income securities issued and/or guaranteed by any single country any credit rating, pre-IPO and cornerstone investment, collective investment schemes (authorised by the SFC), cash equivalent instruments and financial derivative instruments ("FDIs") for hedging or investment purposes.
- The Fund may invest in depositary receipts that may generate additional risks compared to a direct exposure to the underlying stocks, including the risk of non-segregation of the underlying stocks from the depositary banks' own assets and liquidity risk. These may negatively affect the performance and/or liquidity of the Fund.
- Investment in equity securities is subject to market risk and the prices of such securities may be volatile, including but not limited to changes in investment sentiment, political environment, economic environment, regional or global economic instability, currency and interest rate fluctuations.
- The Fund will focus its investments in China-related equities. The Fund is likely to be more volatile than a broad-based fund, as the Fund is more susceptible to fluctuations in value resulting from limited number of holdings or from unfavourable performance in such equity that the Fund invests in. Invest in the China Leap Equity Securities is subject to significant volatility, risk greater than diversified funds, government policy, dynamic market conditions, new competing products and services, and rapid improvements in existing products and services.
- Investment in PRC markets is subject to greater political, tax, economic, foreign exchange, liquidity, legal and regulatory risk.
- Investment in debt instruments are subject to liquidity risk, credit risk, interest rate risk, credit rating risk, valuation risk, downgrade risk and sovereign debt risk.
- Investment in other funds may no assurance that the liquidity of the underlying be sufficient to meet redemption request and investment objective and strategy is successfully achieved.
- Some Classes of the Fund are denominated and settled in RMB; subscription and redemption must be made in RMB. RMB is not freely convertible and is subject to exchange controls and restrictions. There is no guarantee that RMB will not depreciate. If you convert HKD or any other currencies into RMB in investing in the Fund and subsequently convert the RMB redemption proceeds back to HKD or such other currencies, you may suffer a loss if RMB depreciates against HKD or such other currencies.
- The Fund will hold investments denominated in currencies different to the base currency of the Fund, meaning the Fund will bear risk to adverse movements in the foreign currency rates.
- The Fund may acquire FDIs for investment and/or hedging purposes. Risks associated with FDIs include counterparty/credit risk, liquidity risk, valuation risk, volatility risk and over-the-counter transaction risk. In adverse situations, hedging may become ineffective and the Fund may suffer significant losses.

▲ Investment Objective

The Fund seeks to maximize capital growth by investing primarily (i.e. at least 70% of its net assets) in equity securities (such as but not limited to listed shares, depositary receipts, and exchange traded funds) of China-related companies with registered offices located in the People's Republic of China ("PRC") and/or Hong Kong, and/or China-related companies that do not have their registered offices in the PRC or Hong Kong but either (a) carry out a predominant proportion of their business activities in the PRC or Hong Kong, or (b) are holding companies which predominantly own companies with registered offices in the PRC or Hong Kong, which, in the opinion of the Manager, have strong prospects for leap growth or will benefit from leap growth of China ("China Leap Equity Securities").

▲ Manager's Comment

MSCI China index slightly rose by 0.12% in August, and outperformed most overseas equity markets, mainly driven by China's resumed stabilization measures and the better-than-expected earnings growth of most Chinese Internet giants. Both July credit data and July macro-economic data came in lower than expected, which highlighted the soft domestic demand, the weak private sector sentiment, and the negative impacts from recent COVID resurgence in mainland China. However, China resumed the pro-growth policies, including the policy rate cuts and the extra fiscal stimulus package, after the economic slowdown in July, which helped the momentum and sentiment pick-up and led to China equities' relative resilience in August.

The fund underperformed the benchmark in August by 0.97%. Most underperformance happened in the last week of August when the market index rebounded sharply led by Internet giants. The stock selection in Internet and property sectors achieved positive relative returns while the overweight positions on healthcare sector resulted in negative relative returns.

Looking forward, we think the market valuation has been very attractive but expect the relatively high market volatility to continue in the short run. We expect the upcoming August credit and macro-economic data to show marginal improvement thanks to a low base, while the recent regional COVID outbreaks, the drought shock and the regional power shortage may weigh on activities. Externally, the hawkish speech delivered by Fed Chair Jerome Powell at the Jackson Hole Symposium knocked global markets into risk-off mode.

As China's 20th National Party Congress, held every 5 years to elect the new Party leadership, is set to begin on Oct 16, we are going to enter a stability maintenance window, which means the potential short-term downside risks should be limited. In terms of portfolio positioning, we will continue to seek a balance between value and growth.
