

ChinaAMC Select China Leap Equity Fund

Fund Factsheet

As of 30 Nov 2023

37/F, Bank of China Tower, 1 Garden Road, Hong Kong

Investment involves risks, including the loss of principal. The price of units or shares of the Funds may go up as well as down. Past performance is not indicative of future results. The value of the Funds can be extremely volatile and could go down substantially within a short period of time. You should read the Fund's Placing Memorandum or Explanatory Memorandum and Product Key Facts Statement for details, including risk factors. Investors should not base investment decisions on this marketing material alone. Please note:

- ChinaAMC Select China Leap Equity Fund (the "Fund") invests primarily in equity securities of China-related companies with registered offices located in the People's Republic of China ("PRC") and/or Hong Kong, and/or China-related companies that do not have their registered offices in the PRC or Hong Kong which in the opinion of the Manager, have strong prospects for leap growth or will benefit from leap growth of China, by accessing whether the company's business revenue is driven by Chinese consumption increase, technology progress or demographic trend, or whether the company is covered by the development plans of the Chinese government, including but not limited to the "14th Five-Year Plan of China", the "Made in China 2025 Plan", the "Carbon Neutrality Strategy of China".
- The Fund may invest in fixed income securities issued and/or guaranteed by any single country any credit rating, pre-IPO and cornerstone investment, collective investment schemes (authorised by the SFC), cash equivalent instruments and financial derivative instruments ("FDIs") for hedging or investment purposes.
- The Fund may invest in depositary receipts that may generate additional risks compared to a direct exposure to the underlying stocks, including the risk of non-segregation of the underlying stocks from the depositary banks' own assets and liquidity risk. These may negatively affect the performance and/or liquidity of the Fund.
- Investment in equity securities is subject to market risk and the prices of such securities may be volatile, including but not limited to changes in investment sentiment, political environment, economic environment, regional or global economic instability, currency and interest rate fluctuations.
- The Fund will focus its investments in China-related equities. The Fund is likely to be more volatile than a broad-based fund, as the Fund is more susceptible to fluctuations in value resulting from limited number of holdings or from unfavourable performance in such equity that the Fund invests in. Investment in the China Leap Equity Securities is subject to significant volatility, risk greater than diversified funds, government policy, dynamic market conditions, new competing products and services, and rapid improvements in existing products and services.
- Investment in PRC markets is subject to greater political, tax, economic, foreign exchange, liquidity, legal and regulatory risk.
- Investment in debt instruments are subject to liquidity risk, credit risk, interest rate risk, credit rating risk, valuation risk, downgrade risk and sovereign debt risk.
- Investment in other funds may no assurance that the liquidity of the underlying be sufficient to meet redemption request and investment objective and strategy is successfully achieved.
- Some Classes of the Fund are denominated and settled in RMB; subscription and redemption must be made in RMB. RMB is not freely convertible and is subject to exchange controls and restrictions. There is no guarantee that RMB will not depreciate. If you convert HKD or any other currencies into RMB in investing in the Fund and subsequently convert the RMB redemption proceeds back to HKD or such other currencies, you may suffer a loss if RMB depreciates against HKD or such other currencies.
- The Fund will hold investments denominated in currencies different to the base currency of the Fund, meaning the Fund will be at risk to adverse movements in the foreign currency rates.
- The Fund may acquire FDIs for investment and/or hedging purposes. Risks associated with FDIs include counterparty/credit risk, liquidity risk, valuation risk, volatility risk and over-the-counter transaction risk. In adverse situations, hedging may become ineffective and the Fund may suffer significant losses.

▲ Investment Objective

The Fund seeks to maximize capital growth by investing primarily (i.e. at least 70% of its net assets) in equity securities (such as but not limited to listed shares, depositary receipts, and exchange traded funds) of China-related companies with registered offices located in the People's Republic of China ("PRC") and/or Hong Kong, and/or China-related companies that do not have their registered offices in the PRC or Hong Kong but either (a) carry out a predominant proportion of their business activities in the PRC or Hong Kong, or (b) are holding companies which predominantly own companies with registered offices in the PRC or Hong Kong, which, in the opinion of the Manager, have strong prospects for leap growth or will benefit from leap growth of China ("China Leap Equity Securities").

Geographical Exposure (%)

▲ Manager's Comment

MSCI China index rose by 2.28% in November, which put an end to the continuous decline lasted for months. Policies proactively responded to the property slowdown. PBoC will reportedly introduce 1trn yuan low-cost funding via PSL for urban village and public housing. Select tier 1 and 2 cities cut downpayments on second homes and others removed price controls for land auctions. A whitelist of 50 developers was reported to be in the works for funding support. On Nov 15, President Xi Jinping and President Joe Biden met at the Asia-Pacific Economic Cooperation event, which eased expectations regarding the China-US relationship.

The fund outperformed the benchmark in November by 7.60%. The overweight position on energy and underweight position on financials, and stock selection in utilities, real estate, information technology, materials and consumer staples achieved positive relative returns, while the overweight positions on real estate, and stock selection in financials resulted in small negative relative returns.

Looking forward, we maintain our long-term positive view on China equity market. Currently, the valuation of the Chinese stock market is at historical lows, and we believe that a corrective rebound will have some support as we approach the end of the year. Domestic policy support will continue, especially with important events such as the year-end Politburo meeting and the Central Economic Work Conference on the horizon.

In terms of portfolio positioning, we will continue to seek a balance between value and growth. We continue to focus on the long-term policy beneficiaries (eg. software localization and advanced manufacturing), short-term policy beneficiaries (property and property-related sectors) and reopening-related opportunities (eg. consumer, Internet and financials). We will pay close attention to property sales, senior level US/China economic communication, and the policy tone on incremental easing at the Central Economic Work Conference.
