

# ChinaAMC Strategic Fixed Income Fund

Fund Factsheet | As of 31 Jul 2025

New Capital Investment Entrant Scheme (New CIES) Eligible fund

Investment involves risks, including the loss of principal. The price of units or shares of the Fund may go up as well as down. Past performance is not indicative of future results. The value of the Funds can be extremely volatile and could go down substantially within a short period of time. You should read the Fund's Explanatory Memorandum and Product Key Facts Statement for details, including risk factors. Investors should not base investment decisions on this marketing material alone. Please note:

- The Fund aims to achieve income and long-term capital appreciation by investing not less than 70% of its NAV in fixed income and debt securities worldwide.
- The Fund is subject to credit /counterparty risk, interest rate risk, volatility and liquidity risk, downgrading risk, sovereign debt risk, valuation risk, PRC credit rating agency risk, concentration risk, emerging markets risk, PRC tax risk and risk associated with "Dim Sum" bond.
- The Fund may invest all of its assets in fixed income and debt securities rated below investment grade or unrated, which are generally subject to lower liquidity, higher volatility and greater risk of loss of principal and interest. The value of the Fund may be more volatile.
- Investment in mortgage-backed securities ("MBS") may be prone to substantial price volatility. MBS may be subject to greater credit, liquidity and interest rate risk compared to regular bonds and debt securities, and extension and prepayment risks and risks that payment obligations relating to the underlying assets are not met.
- Debt instruments with loss-absorption features are subject to the risk of being written down or converted to ordinary shares upon the occurrence of certain pre-defined trigger events, which are complex and difficult to predict and may result in a significant or total reduction in the value of such instruments.
- The Fund is subject to risks associated with securities financing transactions.
- The Fund may acquire FDIs, which involves counterparty/credit risk, liquidity risk, valuation risk, volatility risk, and OTC transaction risk. In adverse situations, use of FDIs may become ineffective and/or cause the Fund to suffer significant loss.
- The Fund's investment may be denominated and a unit class may be designated in a currency other than its base currency. The NAV of the Fund may be affected unfavourably by exchange rates and by changes in exchange rate control.
- RMB is not freely convertible and is subject to exchange controls and restrictions. Any depreciation of RMB could adversely affect the value of investors' investments in the Fund. Investors of hedged RMB denominated classes have to bear the associated hedging costs and there is no guarantee that the hedging strategy will fully and effectively eliminate the currency exposure.
- Payment of dividends out of capital and/or effectively out of capital amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to those original investments. Any such distributions may result in an immediate reduction of the NAV per Share of the Fund.

## Investment Objective

The investment objective of the Fund is to achieve income and long-term capital appreciation.

1 Please refer to the Fund's prospectus for further details (including fees).

2 Past performance information is not indicative of future performance. Investors may not get back the full amount invested. The computation basis of the performance is calculated on NAV-to-NAV, with dividend reinvested.

3 For the latest fund dividend distribution, please refer to company website: <https://www.chinaamc.com.hk/product/chinaamc-strategic-fixed-income-fund/#distributionHistory>

4 Calculated since the inception date of each respective share class.

5 Credit rating is calculated using the "Best Rating Approach", by referencing to the credit ratings of three credit rating agencies: Moody's, Fitch and S&P and using the highest rating among the three ratings.

6 Calculated with the weighted average of median yield to worst of each holding. Yield to Worst is the lowest potential yield on a bond assuming no default by the issuer. It is calculated by evaluating the least favourable outcome for each bond issue. It is not indicative of the fund's actual performance, or the interest investors may ultimately receive.
