Investment involves risks, including the loss of principal. The price of units or shares of the Funds may go up as well as down. Past performance is not indicative of future results. The value of the Funds can be extremely volatile and could go down substantially within a short period of time. You should read the Fund's Placing Memorandum or Explanatory Memorandum and Product Key Facts Statement for details, including risk factors. Investors should not base investment decisions on this marketing material alone. Please note:

- ChinaAMC Select USD Money Market Fund (the "Fund") seeks to achieve its objective by investing not less than 70% of its NAV in USD denominated and settled short-term deposits, high quality money market instruments of varying maturities.
- The Fund is an investment fund and not a bank deposit.
- Investment in money market instruments involves short-term fixed income and debt securities risk, volatility and liquidity risk, credit risk, interest rate risk, credit rating risk, valuation risk, downgrade risk, sovereign debt risk and credit rating agency risk.
- Investment in short-term deposits is subject to the credit risks of the financial institutions that offer such deposits.
- The Fund will invest primarily in USD-denominated instruments. The value of the Fund may be more volatile than that of a fund having a more diverse portfolio of investments.
- Certain investments acquired by the Fund are denominated in currencies different from its base currency. The NAV of the Fund may be affected by exchange rates and changes in exchange rate controls.
- The Fund will invest in emerging markets (including Mainland China), which involves risks associated with emerging market, greater political, tax, economic, foreign exchange, liquidity, legal and regulatory risks.
- RMB is not freely convertible and is subject to exchange controls and restrictions. Any depreciation of RMB could adversely affect the value of the Fund. Payment of redemptions and/or dividend in RMB may be delayed due to exchange controls and restrictions.
- The Fund may acquire FDIs for hedging purpose. The price of a derivative instrument can be very volatile and involves counterparty risk. In adverse situations, such hedging may become ineffective and the Fund may suffer significant losses.
- The Fund may at its discretion pay distribution out of capital or effectively out of capital. Payment of distributions out of capital or effectively out of capital amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment. Any such distributions may result in an immediate reduction in the NAV per Unit of the Fund.

## Investment Objective

The Fund's objective is to invest in short-term deposits and high quality money market instruments to achieve long-term return in US Dollars in line with prevailing money market rates, with primary considerations of both capital security and liquidity.
